- Brite Brushed Stainless MPV800FBS
- Dove Gray WS90-80 *(custom order only)
 - Gray Morocco WS90-83
 - Slate WS90-53X
- Sterling Royce WS90-77

Application Guide

Prepare the surface to which the vinyl will be applied by removing all residue and making sure it is clean and smooth. Cut the Su-Pro® vinyl to the required length without removing the liner.

Fill a 32 oz. spray bottle with water and add one tablespoon of Joy dish washing soap. Spray the solution onto the surface of the vending machine to reduce adhesive tension while positioning the vinyl (not necessary for delayed-set adhesive).

As you align the vinyl along the top of the machine, gradually remove the liner.

After the vinyl is applied, use a squeegee to smooth vinyl from the center outward, firming its position. Wipe dry. Presto! A beautiful like-new vending machine!
